SYNOPSIS: A shock of recognition in social work school leads award-winning filmmaker Sarah Entine to explore how undiagnosed dyslexia and ADHD have impacted three generations in her family, starting with her own struggles. With surprising candor, vulnerability and even a touch of humor, Read Me Differently reveals the strain of misunderstood learning differences on family relationships. It is a unique film that will generate thoughtful discussion whether in a classroom setting, work environment or at home with family members and friends.

FACTS: An estimated 15-20% of the population in the United States has dyslexia, and 4.5 million children have been diagnosed with Attention Deficit Hyperactivity Disorder (ADHD).
